**Investment Objective**

**VALIDUS'** Global Growth strategy seeks growth and capital appreciation by investing in 35 global equities with compelling growth stories and convincing positive buying behaviors while implementing stock-specific risk management tools.

**Investment Process**

**VALIDUS** relies on internal research to identify high-conviction equity investment ideas in the U.S. and abroad, without regard to Wall Street wisdom or market benchmarks. Each idea is supported by a clear growth thesis, including catalysts capable of driving earnings higher over time, and evaluated using its proprietary S.C.O.R.E. ranking system - a Systematic Customized Opportunity and Risk Evaluation. Each company's ranking aggregates multi-factor analysis of investor buying behaviors, growth thesis, financial capacity, and company/industry risks.

*Investment Performance*

n/a - The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three-year annualized standard deviation is not presented for 2013 through 2015 due to less than 36 months of composite data.

**VALIDUS Global Growth Composite** includes all actual, fee-paying discretionary taxable and tax-exempt portfolios that invest in the **VALIDUS** Global Growth strategy. The strategy seeks growth and capital appreciation by investing in 35 global equities with compelling growth stories and convincing positive buying behaviors while implementing stock-specific risk management tools. The benchmark for the **VALIDUS** Global Composite is the MSCI All Country World Index Net USD (ACWI). The composite was created on August 17, 2017 and the inception date is August 1, 2013. The MSCI ACWI Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 49 country indices comprising 23 developed and 26 emerging market country indices. In presentations shown prior to 10/31/2018, the composite was compared against the MSCI ACWI GR USD Index. The benchmark was changed to more accurately reflect the strategy of the composite. The minimum account size for this composite is \$50,000. The list of firm composite descriptions is available upon request.

**Investing in the stock market involves gains and losses and may not be suitable for all investors. Different types of investments and/or investment strategies involve varying levels of risk, including loss of principal, and there can be no assurance that any specific investment or strategy will be suitable or profitable for a client's or prospective client's portfolio. The potential for profit is accompanied by the potential for loss.** Annual Composite Performance Net is calculated net of transaction and management fee expenses. Performance is total return, meaning dividends, interest, and other earnings have been reinvested. Performance is calculated in US dollars. Composite dispersion represents the asset-weighted dispersion of portfolio returns. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown.

**Portfolio Characteristics Definitions.** For the purposes of the calculations on page one, the following definitions apply: **S.C.O.R.E.** – **VALIDUS'** proprietary Systematic Customized Opportunity and Risk Evaluation. **Expected Growth** – **VALIDUS'** estimate of long-term (3 year) EPS (earnings per share) growth rate. **Forward P/E** – Current stock price divided by next year's EPS. **Forward PEG** – Forward P/E divided by Expected Growth multiplied by 100. **Current Div. Yield** – Expected next-twelve months' dividend divided by stock price. **Market Cap** – Current stock price multiplied by the number of shares outstanding. **BETA** – Estimated measure of the volatility of a security in comparison to the market as a whole.

**Upside Market Capture Ratio** measures the manager's performance in up markets relative to the performance of the market (index) itself. An up market is defined as any period (month or quarter) where the market's return is greater than or equal to zero. **Downside Market Capture Ratio** measures the manager's performance in down markets relative to the performance of the market (index) itself. A down market is defined as any period (month or quarter) where the market's return is less than zero. **R-Squared** (sometimes referred to as the coefficient of determination) measures the reliability of the statistical estimates of alpha and beta as a linear function of the market. A product with a high R-Squared can generally have most of its variance explained by the variations in the benchmark index. As a consequence, the estimates of alpha and beta can be used with confidence. **Standard Deviation** measures the central tendency of a probability distribution. The more a product varies from its mean, the higher the standard deviation. **Alpha** measures nonsystematic return or the return that cannot be attributed to the market. Thus, it can be thought of as how the manager performed if the market has had no gain or loss. **Batting Average** is defined as the number of periods that the product outperforms the benchmark divided by the total number of periods for the entire period. **Sharpe Ratio** is a measure of risk-adjusted return. It divides excess return by risk. Excess return is defined as the annualized return of the manager minus the annualized return of the risk free rate. Risk is defined by standard deviation. A high value for the Sharpe Ratio is generally considered to be positive since either the excess return is rather large or the level of risk is low. **Sortino Ratio** is a measure of risk-adjusted return (similar to Sharpe Ratio). It divides excess return by risk. Excess return is defined as the annualized return of the manager minus the annualized return of the target (also referred to as the Minimum Acceptable Return or MAR). Risk is defined by Downside Risk. A high value for the Sortino Ratio is generally considered to be positive since either the excess return is rather large or the level of risk is low.

**VALIDUS** Growth Investors, LLC ("**VALIDUS**") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. **VALIDUS** has been independently verified for the periods 08/01/2013 – 12/31/2018 by ACA Compliance Group. The verification report(s) is/are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

**VALIDUS** is a registered investment advisor. **VALIDUS** as the firm, is a separate part of Lucia Capital Group, and functions as a mid-sized advisory firm. **VALIDUS** primarily manages a number of separately managed accounts (SMAs) across strategies ranging from US-specific strategies to international-only strategies.

**VALIDUS** offers separate account investment management services to institutional clients, including public and private pension plans, endowments and foundations, and high net worth individuals. **VALIDUS** also provides its model portfolio strategies, in a sub-advisor capacity to certain investment advisory programs, including Unified Managed Account (UMA) and wrap fee programs.
